AllDayRTK RINEX Customers

Please Read: Important Information

1 What

The AllDayRTK team is pleased to advise that RINEX downloads have been upgraded. Every download now includes precise orbit data, and RINEX keys for your software and scripts are now created in the AllDayRTK map.

2 When?

The upgrade is available from 23/11/2026.

What's changing	Before	Now	What you need to do
Precise orbit data	Not included	Included in every download, using the most accurate orbits available for each day	Nothing
Navigation data	Usually available the following day	Available on the same day, then updated as more accurate data is published	Nothing
RINEX keys	Issued on account creation with no expiry.	Created in the AllDayRTK map, valid for 1, 2 or 3 years	Move to a new key before 24/11/2028
Merged RINEX files	A one-day file was named 23H	A one-day file is named 01D, matching its full period	Check any scripts that read file names

3 Impact!

Existing RINEX keys. If your software or scripts download RINEX data with an existing RINEX key, they continue to work. Please move to a new key created in the AllDayRTK map before 24/11/2028, when existing keys will be retired. A new key is used in exactly the same way; nothing else in your setup needs to change.

Keys not in recent use. From 24/11/2026, existing keys that have not been used to download RINEX data in the last 12 months are no longer active. This includes keys only used to check which stations or files are available. A new key can be created in the AllDayRTK map at any time.

Please note: creating a new key switches off your account's existing RINEX keys, so update your software at the same time.

Download sizes. With orbit data included, downloads are slightly larger. If a very large request goes over the download size limit, split it into smaller date ranges. Request limits now apply to your whole account, across all of your RINEX keys.

More options. You can also choose which data each download includes, with precise clock data available as an option.

4 Help?

If you require further information, please contact our support teams.

Thank you for your co-operation.
