

# The next legend... GREEN BEAM

**The Breakthrough** in LaserEDGE technology... **The Brightest** line laser has arrived. A crossline, plumb dot multiple functions, higher visibility creating longer range, slope mode locking, outdoor function and various mounting options in the most accurate and efficient package available.

With the **brightest**, high definition green beam, the Imex LX22G comes with superior technology and is the new generation tool for every interior tradesman.

- **Hyper-bright** line, dots
- Self levelling
- Vertical & Horizontal lines
- Plumb up & Plumb down spot
- Level lock for slope hold
- Swivel base, magnetic wall bracket
- Attaches to standard tripod camera tripod or laser pole
- Outdoor mode for optional detector

### Inclusions

- LX22G unit
- Magnetic bracket
- Target plate
- Carry case

### Options

- Tripod
- Outdoor detector

| Specifications 012-LX22GS includes tripod |                                        |
|-------------------------------------------|----------------------------------------|
| Light Class                               | 532nm Class 11 Green Beam              |
| Range                                     | Up to 40m-light dependent              |
| Range with detector                       | 55m outdoors                           |
| Accuracy                                  | +/- 2mm @ 10m                          |
| Laser                                     | 1 vertical / 1 horizontal / plumb spot |
| Power Source                              | 4 x AA                                 |
| Operating time                            | 16 hrs all lasers                      |
| Protection Class                          | IP54                                   |
| Operation Temp Range                      | -10°C to +50°C                         |
