Users directly accessing RTK or RINEX services from the updated sites or working in nearby network areas may notice a coordinate shift within positional uncertainty limits. Users who see differences that exceed positional uncertainty are advised to re-localise or re-adjust GNSS observations to align with the new Regulation13 coordinates. Positional uncertainty values for sites can be found on the Regulation13 certificates published on the AllDayRTK webmap <https://www.positionpartners.com.au/alldayrtk/map/>
