

**Attention**  
**AllDayRTK Users**  
**New Regulation 13 Certificates**  
**Please Read: Important Information**

**1 What**

The AllDayRTK team advises that the Burren Junction (BJCT) and White Cliffs (WTCF) bases will have its coordinates updated to reflect newly issued Regulation 13 Certificate coordinates.

The difference between the new and old coordinates are outside of positional uncertainty (PU). Please also note that the issuing government agency has also increased the positional uncertainty values.

Base	Coordinate Field	Difference (Previous – New Reg13) (m)	New Positional Uncertainty (m)
<b>BJCT</b> Burren Junction	Easting	0.029	0.021
	Northing	-0.008	0.021
	Height	0.041	0.046
<b>WTCF</b> White Cliffs	Easting	-0.015	0.021
	Northing	-0.033	0.021
	Height	0.076	0.045

**2 When?**

13/08/2024, 12:00 PM AEST

**3 Impact!**

Users may notice a coordinate shift as the difference between the old and new Regulation 13 certified coordinates are outside of PU.

Positional shift of base station coordinates can impact users, which may be evident when checking against previously established survey control points and marks.

**4 Recommendation**

We advise that users check existing controls to ensure that any differences found does not affect any pre-existing work.

Re-localisation of jobs and control points may need to be performed to minimise the differences due to the shift and change in coordinates.

**5 Help?**

If you require further information, please contact our support teams.  
Thank you for your co-operation.
