

Creating a LINE STYLE

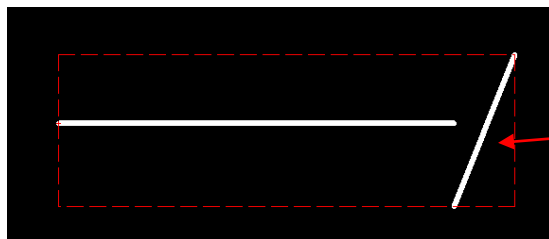

In this exercise we will be creating a Fence Linestyle

1. Go into the Line Styles editor using **FILE** → **LINE STYLE EDITOR** → **NEW**
2. Select **INSERT** → **LINE** and ensure that Point radiation is set by using the icon shown below.

Point Radiation

3. Click any point on screen for your starting point. This will not affect the line style definition.
4. Now draw a single line on a bearing of 90 degrees and distance of 7 units.
5. Draw a diagonal line with your mouse approximately 2 units long at the end of the line as shown below:

Approx. 2 units long

6. Set insertion point by **EDIT** → **SET INSERTION POINT** and left click the start of your line. Next select a point to determine the linestyle segment length. (This is where you wish to end the linestyle)
7. **EDIT** → **DEFINITION**, this will verify the length and properties of the linestyle.
8. **FILE** → **SAVE LINSTYLE AS**
